Short description	
Prerequisites	Fundamentals of economic theory, international economic relations, and international business.
What will be studied?	The concept of ethics and social responsibility in international companies.
Why is it interesting and should be learnt?	In the most developed countries in the world, corporate social responsibility has become widespread, and it is concerning companies that take responsibility for their own influence on society. In particular, in world practice there are a number of factors that affect the growth of the number of companies that implement the concept of corporate social responsibility in their activities, as well as adhere to corporate ethics: the desire to occupy a worthy market niche, to achieve a specific effect, to avoid certain risks, as well as to increase competitive pressure. That is concerning good practices of corporate social responsibility or strengthening regulation or self-regulation in a specific area of corporate social responsibility. Therefore, the study of corporate ethics and corporate social responsibility is useful and interesting.
What can be learnt? (study results)	The essence, features of the formation and development of corporate ethics and social responsibility of both national and international companies.
How can the acquired knowledge and skills (competences) be used?	To carry out the implementation process, as well as to ensure the development of corporate ethics and social responsibility of the company.
